ADMINISTRATIVE-INTERNAL USE ONLY

OIT 0649-86
8 AUG 1986

MEMORANDUM FOR: Chief, Information Systems Security Division
Office of Security

STAT   FROM:
Deputy Director for Management
Office of Information Technology

SUBJECT: Minimum Security Standards for Automated
Data Processing Systems

1. OIT has reviewed the proposed Minimum Security Standards for Automated Data Processing Systems. We cannot, at this time, agree to its implementation on 1 October 1986. The concerns and observations of the various groups within OIT are so far ranging and numerous that they cannot be easily synopsized. Some of these are attached to give you a flavor for our concerns.

2. We feel that much work needs to be done on the Standard and suggest that a working group consisting of data processing and communications experts from across the Agency be formed to assist ISSD in producing a standard and an implementation schedule that is reasonable in the Agency

STAT   environment. _____ is your point of contact for questions and follow-up action. She can be reached on secure

STAT   extension _____ or on AIM under
